

Zakaz-AF E-Commerce Platform

Complete Project Report

Project Name: Zakaz-AF

Developer: Khairullah Chakir

Completion Date: January 2, 2026

Platform: Android Mobile Application with Laravel Backend

Live URL: <https://zakaz-af.store>

API Endpoint: <https://api.zakaz-af.store/api>

1. Executive Summary

Zakaz-AF is a comprehensive e-commerce mobile application designed specifically for the Afghan market. The platform enables local Afghan shopkeepers to sell their products online while providing customers with a convenient way to shop for groceries, fashion, electronics, and more with home delivery.

Key Achievements:

- ✓ Fully functional Android mobile application
- ✓ Secure Laravel REST API backend
- ✓ Production deployment with SSL/HTTPS
- ✓ Multi-language support (English, Dari, Pashto)
- ✓ Real-time chat between buyers and sellers
- ✓ Push notifications for order updates
- ✓ Marketplace for user-to-user selling
- ✓ Admin dashboard for store management

2. Project Overview

2.1 Problem Statement

Afghanistan lacks a comprehensive local e-commerce solution that:

- Supports local languages (Dari and Pashto)
- Works reliably with limited internet connectivity
- Connects local shopkeepers with customers
- Provides cash-on-delivery payment options

2.2 Solution

Zakaz-AF addresses these challenges by providing:

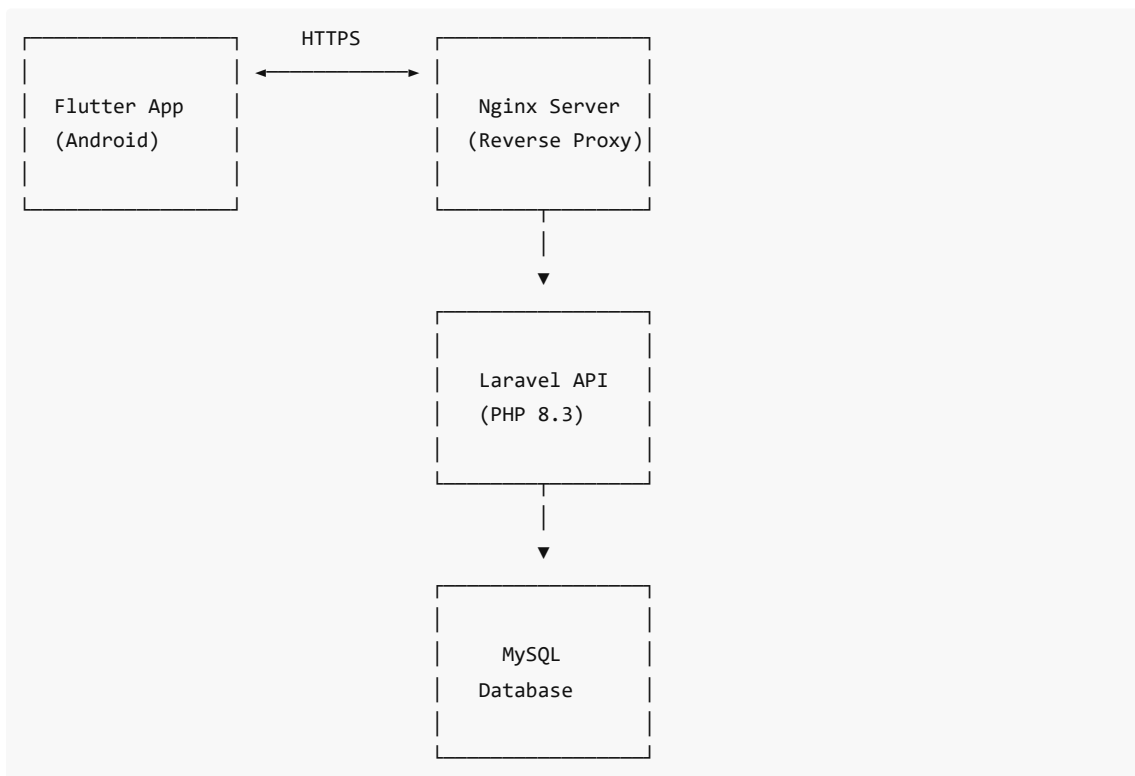

- A user-friendly mobile app with RTL (Right-to-Left) support
- Offline-first architecture for poor connectivity areas
- Direct communication between buyers and sellers
- Multiple payment options including cash on delivery
- A marketplace for peer-to-peer selling

2.3 Target Audience

User Type	Description
Customers	Afghan residents looking to shop online
Shop Owners	Local Afghan shopkeepers wanting to sell online
Marketplace Sellers	Individuals wanting to sell used/new items
Administrators	Platform managers and moderators

3. Technical Architecture

3.1 System Architecture

3.2 Directory Structure

4. Technology Stack

4.1 Mobile Application

Technology	Version	Purpose
Flutter	3.x	Cross-platform UI framework
Dart	3.x	Programming language
Riverpod	2.x	State management
Dio	5.x	HTTP client

Go Router	6.x	Navigation
Firebase	Latest	Push notifications
SharedPreferences	-	Local storage
Cached Network Image	-	Image caching

4.2 Backend

Technology	Version	Purpose
Laravel	12.x	PHP Framework
PHP	8.3	Server-side language
MySQL	8.0	Database
Nginx	Latest	Web server
Composer	2.x	Dependency management
Laravel Sanctum	-	API authentication

4.3 Infrastructure

Component	Provider	Details
VPS Server	VPSDime	Ubuntu 24.04 LTS
Domain	Namecheap	zakaz-af.store
SSL Certificate	Let's Encrypt	Auto-renewal enabled
Code Repository	GitHub	Private repository
APK Hosting	GitHub Releases	Free hosting

5. Mobile Application Features

5.1 Authentication Module

Feature	Description
Email/Password Login	Traditional authentication
Google Sign-In	OAuth 2.0 integration
OTP Verification	Phone number verification
Password Reset	Email-based recovery
Guest Mode	Browse without account
Token Refresh	Automatic session renewal

5.2 Product Catalog

Feature	Description
Category Browsing	Organized product categories
Product Search	Full-text search capability
Product Details	Images, description, reviews
Wishlist	Save favorite products
Product Reviews	Star ratings and comments
Sort & Filter	Price, popularity, rating

5.3 Shopping Cart

Feature	Description
Add/Remove Items	Cart management
Quantity Adjustment	Update item quantities
Price Calculation	Real-time total updates
Multi-shop Checkout	Combined orders
Saved Cart	Persistent across sessions

5.4 Order Management

Feature	Description
Order Placement	Complete checkout flow
Order Tracking	Real-time status updates
Order History	View past orders
Order Details	Full order information
Push Notifications	Status change alerts

5.5 Chat System

Feature	Description
Buyer-Seller Chat	Direct messaging
Marketplace Chat	P2P communication
Image Sharing	Send photos in chat
Message Notifications	Real-time alerts

Conversation List	All active chats
-------------------	------------------

5.6 Marketplace (P2P)

Feature	Description
Create Listing	Sell personal items
Edit/Delete Listing	Manage your listings
Image Upload	Multiple photos per listing
Contact Seller	In-app messaging
Listing Categories	Organized browsing

5.7 User Profile

Feature	Description
Profile Management	Edit personal info
Address Book	Multiple delivery addresses
Notification Settings	Customize alerts
Language Selection	EN, Dari, Pashto
Theme Selection	Light/Dark mode
Help Center	FAQ and support
About	App information
Privacy Policy	Legal information
Terms of Use	User agreements

5.8 Admin Features

Feature	Description
Dashboard	Sales overview
Product Management	Add/edit/delete products
Category Management	Organize categories
Order Management	Process orders
User Management	Manage customers
Shop Settings	Configure store

6. Backend API

6.1 API Endpoints

Authentication

POST	/api/auth/register	# User registration
POST	/api/auth/login	# User login
POST	/api/auth/google	# Google OAuth
POST	/api/auth/logout	# User logout
POST	/api/auth/refresh	# Refresh token
POST	/api/auth/forgot-password	# Password reset request
POST	/api/auth/reset-password	# Password reset
POST	/api/auth/verify-otp	# OTP verification

Products

GET	/api/products	# List products
GET	/api/products/{id}	# Product details
POST	/api/products	# Create product (admin)
PUT	/api/products/{id}	# Update product (admin)
DELETE	/api/products/{id}	# Delete product (admin)
GET	/api/products/search	# Search products

Categories

GET	/api/categories	# List categories
GET	/api/categories/{id}	# Category details
POST	/api/categories	# Create category (admin)
PUT	/api/categories/{id}	# Update category (admin)
DELETE	/api/categories/{id}	# Delete category (admin)

Cart

GET	/api/cart	# Get user's cart
POST	/api/cart	# Add to cart
PUT	/api/cart/{id}	# Update cart item
DELETE	/api/cart/{id}	# Remove from cart
DELETE	/api/cart	# Clear cart

Orders

GET	/api/orders	# List user's orders
GET	/api/orders/{id}	# Order details
POST	/api/orders	# Create order
PUT	/api/orders/{id}/status	# Update order status

Marketplace

GET	/api/marketplace	# List marketplace items
GET	/api/marketplace/{id}	# Item details
POST	/api/marketplace	# Create listing

PUT	/api/marketplace/{id}	# Update listing
DELETE	/api/marketplace/{id}	# Delete listing
GET	/api/marketplace/my-items	# User's listings

Chat

GET	/api/conversations	# List conversations
GET	/api/conversations/{id}	# Conversation messages
POST	/api/conversations	# Start conversation
POST	/api/messages	# Send message

User

GET	/api/user	# Current user profile
PUT	/api/user	# Update profile
PUT	/api/user/fcm-token	# Update FCM token
GET	/api/addresses	# List addresses
POST	/api/addresses	# Add address
PUT	/api/addresses/{id}	# Update address
DELETE	/api/addresses/{id}	# Delete address

Wishlist

GET	/api/wishlist	# Get wishlist
POST	/api/wishlist	# Add to wishlist
DELETE	/api/wishlist/{id}	# Remove from wishlist

Reviews

GET	/api/products/{id}/reviews	# Product reviews
POST	/api/products/{id}/reviews	# Add review

App Settings

GET	/api/app-settings	# Get app configuration
-----	-------------------	-------------------------

6.2 API Response Format

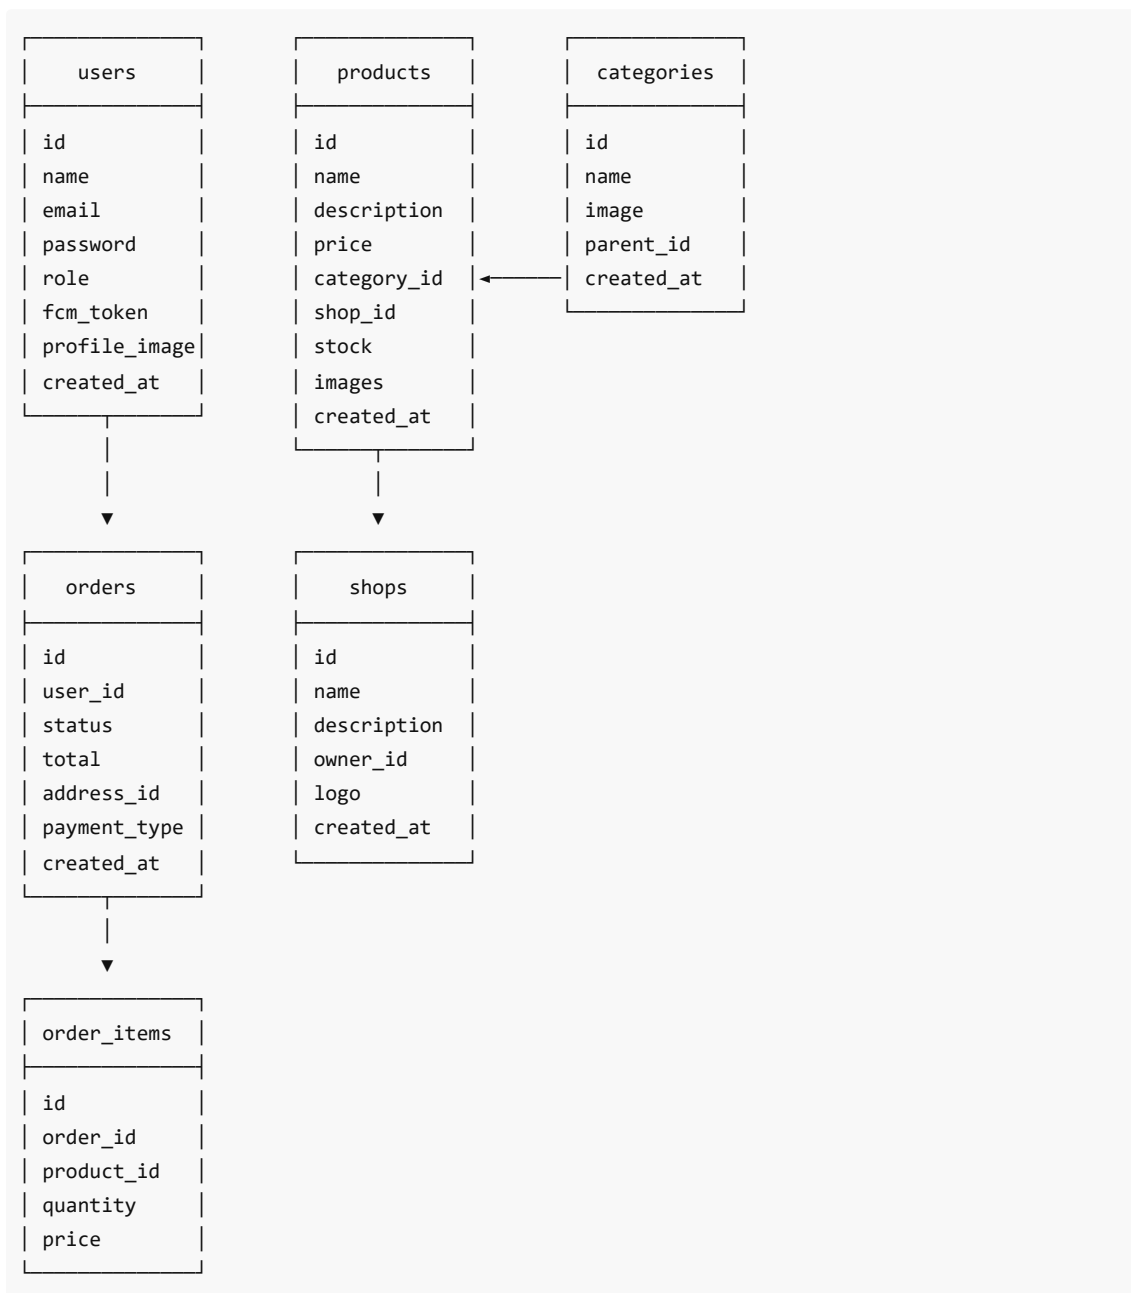

```
{
  "success": true,
  "message": "Operation successful",
  "data": {
    // Response data
  }
}
```

6.3 Error Response Format

```
{
  "success": false,
  "message": "Error description",
  "errors": {
    "field": ["Validation error message"]
  }
}
```

7. Database Design

7.1 Entity Relationship Diagram

7.2 Database Tables

Table	Description	Records
users	User accounts	Dynamic
categories	Product categories	~20
products	Store products	Dynamic
product_images	Product photos	Dynamic
shops	Store information	Dynamic
orders	Customer orders	Dynamic
order_items	Order line items	Dynamic
addresses	Delivery addresses	Dynamic
wishlists	User favorites	Dynamic
reviews	Product reviews	Dynamic
conversations	Chat threads	Dynamic
messages	Chat messages	Dynamic
marketplace_items	P2P listings	Dynamic
marketplace_item_images	P2P listing photos	Dynamic
notifications	Push notifications	Dynamic
app_settings	App configuration	~10
cache	Laravel cache	Dynamic
sessions	User sessions	Dynamic
jobs	Background tasks	Dynamic

8. Security Implementation

8.1 Authentication Security

Feature	Implementation
Password Hashing	Bcrypt (12 rounds)
Token Authentication	Laravel Sanctum
Token Expiration	30 days
Automatic Refresh	On 401 response
Google OAuth	Secure OAuth 2.0

8.2 API Security

Feature	Implementation
HTTPS	SSL/TLS encryption
CORS	Configured for mobile app
Rate Limiting	Laravel rate limiter
Input Validation	Request validation
SQL Injection	Eloquent ORM protection
XSS Prevention	Response sanitization

8.3 Mobile App Security

Feature	Implementation
Secure Storage	SharedPreferences (encrypted)
Certificate Pinning	Optional (future)
Obfuscation	ProGuard enabled
Biometric Auth	Optional (future)

8.4 Server Security

Feature	Implementation
Firewall	UFW (Nginx, SSH only)
SSH Access	Key-based (recommended)
Database	Local access only
File Permissions	Proper ownership
SSL Certificate	Let's Encrypt (auto-renewal)

9. Deployment Infrastructure

9.1 Server Specifications

Component	Specification
Provider	VPSDime
OS	Ubuntu 24.04 LTS
IP Address	185.197.31.25
Storage	SSD

Bandwidth	Unmetered
-----------	-----------

9.2 Software Stack

Software	Version	Status
Nginx	Latest	✔ Running
PHP	8.3	✔ Running
PHP-FPM	8.3	✔ Running
MySQL	8.0	✔ Running
Composer	2.x	✔ Installed
Certbot	Latest	✔ Installed
Git	Latest	✔ Installed

9.3 Domain Configuration

Domain	Purpose	SSL
zakaz-af.store	Main website	✔
api.zakaz-af.store	API endpoint	✔
www.zakaz-af.store	WWW redirect	✔

9.4 Nginx Configuration

```
server {
    listen 443 ssl;
    server_name zakaz-af.store www.zakaz-af.store api.zakaz-af.store;
    root /var/www/zakaz-af/backend/public;

    ssl_certificate /etc/letsencrypt/live/zakaz-af.store/fullchain.pem;
    ssl_certificate_key /etc/letsencrypt/live/zakaz-af.store/privkey.pem;

    index index.php;

    location / {
        try_files $uri $uri/ /index.php?$query_string;
    }

    location ~ \.php$ {
        fastcgi_pass unix:/var/run/php/php8.3-fpm.sock;
        fastcgi_param SCRIPT_FILENAME $realpath_root$fastcgi_script_name;
        include fastcgi_params;
    }
}
```

9.5 Deployment Process

- 1. **Code Push** - Developer pushes to GitHub
- 2. **Server Pull** - Run `git pull` on server
- 3. **Dependencies** - Run `composer install --no-dev`
- 4. **Migrations** - Run `php artisan migrate --force`
- 5. **Cache Clear** - Run `php artisan config:clear`
- 6. **Restart** - Restart PHP-FPM if needed

10. Localization & Internationalization

10.1 Supported Languages

Language	Code	Direction	Status
English	en	LTR	✔ Complete
Dari (Persian)	fa	RTL	✔ Complete
Pashto	ps	RTL	✔ Complete

10.2 Translation Coverage

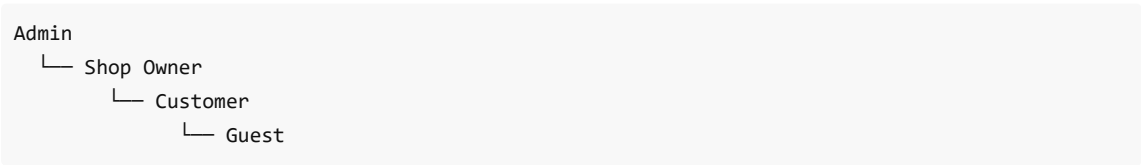

- **Authentication screens** - 100%
- **Home screen** - 100%
- **Product screens** - 100%
- **Cart & Checkout** - 100%
- **Orders** - 100%
- **Profile** - 100%
- **Chat** - 100%
- **Marketplace** - 100%
- **Admin** - 100%
- **Error messages** - 100%

10.3 RTL Support

- Complete mirror layout for RTL languages
- Proper text alignment
- Correct icon placement
- Appropriate font rendering

11. User Roles & Permissions

11.1 Role Hierarchy

11.2 Permissions Matrix

Feature	Guest	Customer	Shop Owner	Admin
Browse Products	✓	✓	✓	✓
View Product Details	✓	✓	✓	✓
Add to Cart	✗	✓	✓	✓
Place Orders	✗	✓	✓	✓
View Order History	✗	✓	✓	✓
Chat with Seller	✗	✓	✓	✓
Create Marketplace Listing	✗	✓	✓	✓
Write Reviews	✗	✓	✓	✓
Manage Own Shop	✗	✗	✓	✓
Add Products to Shop	✗	✗	✓	✓
View Shop Orders	✗	✗	✓	✓
Access Admin Dashboard	✗	✗	✗	✓
Manage All Products	✗	✗	✗	✓
Manage Categories	✗	✗	✗	✓
Manage Users	✗	✗	✗	✓
View All Orders	✗	✗	✗	✓

12. Cost Analysis

12.1 Monthly Costs

Item	Cost	Notes
VPS Hosting	\$5.00	VPSDime
Domain	\$0.17	\$2/year ÷ 12
SSL Certificate	\$0.00	Let's Encrypt (free)
GitHub	\$0.00	Free tier
Firebase	\$0.00	Free tier
Total	\$5.17	Per month

12.2 Annual Costs

Item	Cost
------	------

VPS Hosting	\$60.00
Domain Renewal	\$2.00
Total	\$62.00

12.3 Development Costs

Item	Estimated Hours	Value
Mobile App Development	200+	-
Backend Development	100+	-
UI/UX Design	50+	-
Testing	30+	-
Deployment	10+	-
Total	390+	-

13. Future Enhancements

13.1 Short-term (1-3 months)

Feature	Priority	Status
iOS App	High	Planned
Email Notifications	Medium	Planned
SMS Notifications	Medium	Planned
Payment Gateway Integration	High	Planned
Advanced Analytics	Medium	Planned

13.2 Medium-term (3-6 months)

Feature	Priority	Status
Seller Dashboard Web App	High	Planned
Inventory Management	Medium	Planned
Promotional Codes	Medium	Planned
Flash Sales	Low	Planned
Product Recommendations	Medium	Planned

13.3 Long-term (6-12 months)

Feature	Priority	Status
---------	----------	--------

Multi-vendor Marketplace	High	Planned
Delivery Tracking GPS	High	Planned
AI-powered Search	Medium	Planned
Voice Search	Low	Planned
Augmented Reality Preview	Low	Planned

14. Conclusion

Zakaz-AF represents a significant step forward in bringing e-commerce capabilities to the Afghan market. The platform successfully addresses the unique challenges of the region including:

- **Language barriers** - Full support for English, Dari, and Pashto
- **Limited connectivity** - Efficient data usage and caching
- **Payment preferences** - Cash on delivery option
- **Local focus** - Connecting local shopkeepers with customers

The technical implementation follows modern best practices:

- Clean architecture with separation of concerns
- Secure API with proper authentication
- Scalable infrastructure with room for growth
- Comprehensive feature set for all user types

With the successful deployment of the production environment, Zakaz-AF is ready to serve the Afghan e-commerce market and has the foundation for future growth and enhancement.

Appendix

A. Admin Credentials

Field	Value
Email	khairullahanosh9626@gmail.com
Role	Admin

B. Server Access

Field	Value
IP	185.197.31.25
SSH	ssh root@185.197.31.25

C. Database

Field	Value
Type	MySQL 8.0

Database	zakaz_db
User	zakaz_user

D. Important URLs

URL	Purpose
https://zakaz-af.store	Main domain
https://zakaz-af.store/download.html	APK download page
https://api.zakaz-af.store/api	API endpoint
https://github.com/KhairullahChakir/zakaz-af	Source code

E. APK Information

Field	Value
Package ID	com.zakaz.af
Version	1.0.0
Min Android	7.0 (API 24)
Target Android	14 (API 36)
Size	~80 MB
Signed	Yes (Release key)
